Zhav “Stem Cell” Derma Infusion Mask

A woman with a commitment to natural solutions, Yaffa Zhav also has the credibility and intuition that comes with over 25 years’ experience as a beauty entrepreneur and innovator.

Yaffa has spent her life researching and refining natural beauty techniques that deliver the proven results that modern people demand. “There isn’t a person alive who wants to look as though the effects of age and environment are evident on their face,” says Yaffa, “But by the same token, no one really wants to resort to surgery. I believe that the answer lies in natural solutions that work in harmony with the skin and body, stimulating, detoxifying and regenerating. Nature has the answers. We just need to put careful research into finding them.”

Zhav International is proud to present the revolutionary PhytoCellTec technology. Plant stem cells are obtained and incorporated into cosmetic products to ensure the longevity of skin cells, resulting in amazing Anti-Ageing effects.

Moreover, the Zhav Derma Stem Cell Infusion Mask combines some of the best anti-ageing ingredients:

- Matrixyl 3000, for significant wrinkle decrease
- Chronodyn, provides energy for the cells
- Giga White complex of 7 organic ingredients –excellent for brightening of the skin

ZHAV DERMA STEM CELL INFUSION MASK

High-tech technology to protect human skin stem cells.

Stem Cell technology is based on the fact that our skin has the ability and the potential to remain young. This ability exists

in our Stem Cells, which are located in the basal layer of the epidermis. Their function is to replenish and maintain the balance of cells within the skin tissue and regenerate damaged tissues during injury. The Stem Cells monitor the correct function of the skin, therefore keeping it healthy.

As the skin ages, the ability of our Stem Cells to function decreases. In order to solve this problem, PhytoCellTec re-encourages our skin Stem Cells to perform better, by using outer Stem Cells from a plant origin.

PhotoCellTec is rich in epigenetic factors and metabolites, thus providing the cosmetic benefits of:

- Protecting longevity of skin Stem Cells
- Delaying senescence of essential cells
- Rejuvenating the skin
- Decreasing wrinkles depth
- Fighting against chronological aging
