Magnetic Pulse

Use powerful magnets

How it influences the skin?

- The magnetic field generated draws the hemoglobin in the blood to the surface increasing blood circulation
- Improves lymphatic drainage
- Removes dead skin cells
- Increases cell turnover

Microcurrent Technology Head

500uA of Microcurrent energy

How it influences the skin?

- Increases blood circulation
- Tone and tighten skin
- Boost production of ATP (adenosine triphosphate). ATP causes muscles to contract and relax toning and training them to restore their youthful strength.
- Immediate visible reduction in fine lines and wrinkles

Rejuvenation Technology Head

660nm red spectrum LED light (phototherapy)

How it influences the skin?

- Rejuvenate ageing skin
- Increases collagen and elastin production
- Reduces fine lines and wrinkles
- Homogenizes skin tone
- Boosts skin immunity
- Reduces pore size

How it Works?

The **Wish Pro®** device incorporates the Magnetic Infusion Technology (MIT) that creates a magnetic field. This magnetic field is partially converted to Microcurrent, Red LED, Blue LED, or Magnetic Pulse technologies using different technology heads and together with serum infused treatment capsules, MIT penetrates the active serums into the skin. The unique combination of the MIT technology with the personal serum infused treatment capsules delivers unparalleled results. Technology Heads for better results!

- 15min treatments with amazing results.
- Magnetic with 4 Heads Microcurrent Infusion.
- Magnetic Infusion with Red LED for skin rejuvenation.
- Magnetic + LED Light Blue for Acne Skin.

Blue Ray Technology Head

Use 420nm – 470nm blue light to treat oily and problematic skin.

How it influences the skin?

- P.Acne Bacteria cannot exist in an Oxygen rich environment. When the bacteria comes into contact with Blue Ray Light at a wavelength of 420nm it causes the release of Oxygen making it impossible for the P .Acne bacteria to survive.
- Calms irritated skin

Assorted Infusion Capsules
